

DATA SHEET FOR ORGANIC RAW MACA POWDER
PERUVIAN MACA (*Lepidium meyenii*)

A refreshing energy nutriment grown in the Peruvian Andes, with adequate properties for this use among athletes, students, active persons and for the general wellbeing of every individual. There is also a correlation drawn between it and male potency, improving libido and fertility in both men and women, balancing hormone levels, alleviating symptoms of menopause as well as helping to overcome depression.

PROCESSING METHOD

After harvesting, maca is subjected to a drying process. After a month and a half of drying in the sun, maca is stored away in bags and kept in a cold place, away from humidity.

ACOCEX.

ACOCEX.

DESCRIPTION:

Basic Ingredients:	Alkaloids of Macaenes 1, 2, 3, 4, macamides, glukosinolates, flavonoids, amino acids and fiber.
Constituents:	Flour made of yellow (50%), red (30%) and black (20%) Peruvian maca (<i>Lepidium meyenii</i>)
Form:	Fine Powder
Colour:	Creamy yellow – Golden
Taste and smell:	characteristic
Processed by:	grinding
Origin:	Junin - Peru
Packaging:	polyethylene bags of 10 Kg
Secondary Packaging:	cardboard boxes of 20 Kg

PHYSICAL AND CHEMICAL PROPERTIES:

Humidity	6%
Solubility	100% soluble in water
Mesh Size	80 mesh

METHOD OF STORAGE

To be kept in a ventilated, dry place, away from light and humidity

USE

The dosage is according to scientific research: in the form of powder, from 2 to 5 grams a day

Lima, Perú
